PROFILE

Business intelligence analyst who uses AI to address reporting, SQL, and operational bottlenecks. I guide Claude and OpenAI Codex by defining the problem and acceptance criteria, directing each iteration, reviewing the result, and deciding what is ready to use or release. I combine project management, financial analysis, employee enablement, and an MBA in Digital Technology Management to connect AI-assisted work with practical business outcomes.

EXPERIENCE

Limestone Pillars; Lebanon, Indiana 2025 - Present

Co-founder / Business Director

- Co-founded a web design and AI workflow studio, owning business direction, financial planning, and delivery standards.
- Guided Claude and Codex from requirements through release for EasyPlate, reviewing the resulting FastAPI, PostgreSQL, React, and Gemini product against defined acceptance criteria.

Gaylor Electric; Noblesville, Indiana 2025 - Present

Business Intelligence Analyst

- Guide AI-assisted development and refinement of a SQL troubleshooting tool that reviews thousands of lines of code and returns explained corrections in minutes.
- Cut a recurring week-long reporting process by more than 60% with Excel, Power Query, and automation, returning roughly three analyst-days each month.
- Guided AI-assisted creation of Excel automation that reduces manual handling and strengthens reporting consistency and accuracy.

Gaylor Electric; Lafayette, Indiana 2023 - 2025

Project Manager / Perry Worth Elementary School and Lebanon High School

- Built forecasting models that informed budgets and resource allocation, identifying up to \$200K in annualized labor-cost opportunity.
- Outperformed 90% of internal benchmarks on projects over \$11M while maintaining \$750K positive cash flow.
- Streamlined execution across vendors, field teams, and office stakeholders, helping projected gross profit margin double to over 20%.

Manor House | Evolve Talent; New Zealand | Australia 2019 - 2022

Hostel Manager / Trade Assistant

- Trained staff on booking systems and service standards, contributing to a 7% revenue uplift, and later supported active trade-site operations across crews in Australia.

Epic Systems; Madison, Wisconsin 2018

Project Manager / Alameda Health System

- Led the physician-billing workstream for a \$300M EHR installation, coordinating scoping, configuration, testing, training, and post-live readiness.

EDUCATION

Indiana University, Kelley School of Business; Bloomington, Indiana

Master of Business Administration, Digital Technology Management

GPA: 3.95/4.0 | 2026

Bachelor of Science in Business, Finance and Technology Management

2016
